

Founder-operator and enterprise architect with 23+ years building, scaling, and fixing technology systems. I bring something most fractional executives don't: I've been the person building and running the systems, not just advising on them.

CORE COMPETENCIES

STRATEGIC LEADERSHIP	SECURITY AND RESILIENCE	SYSTEMS AND ARCHITECTURE
IT Strategy and Technology Roadmaps	Cybersecurity Assessment and Risk Management	Enterprise Systems Architecture
Fractional CIO / CISO / COO	Disaster Recovery Verification	ERP/CRM Design and Implementation
Technology Due Diligence	Operational Resilience Architecture	Systems Integration and API Design
Responsible AI Governance	Privacy and Data Protection (PII, HIPAA)	Data Migration Engineering

CAREER HIGHLIGHTS

Founder and CEO

Feb 2026 – Present

Solanasis

Boulder, CO

- Created the Operational Resilience Baseline assessment with SEC, FINRA, and ABA regulatory mapping
- Run real disaster recovery verification through actual backup restores, not policy document reviews
- Lead cybersecurity assessments, secure data migrations with chain-of-custody documentation, and AI implementation with governance guardrails
- Built as an AI-native firm from day one; every governance practice we recommend, we run internally first
- Designed and built Matchkeyz, a privacy-first AI community platform on Blazor/SQL Server; hands-on proof of the AI governance I bring to client engagements

Founder and CEO

2022 – 2025

Sage'd Solutions

Boulder, CO

- Designed a modern ERP architecture on .NET (Blazor, SQL Server) incorporating every lesson from 14 years of building InReach
- Built advanced automation capabilities including automatic grant application workflows for nonprofits
- Privacy-first architecture with full data sovereignty controls; users could customize without hiring consultants

Chief Operating Officer

2021 – 2022

Cohere Network

Sedona, AZ / Vilcabamba, Ecuador

- Joined a pre-infrastructure startup and built the entire technology stack and operational SOPs from zero
 - Created operational workflows and team processes that survived my departure (the mark of durable operations)
 - Set up project management, sprint methodology, and security frameworks for a distributed international team
 - Unified disconnected systems and architected the funnel for a Reg CF crowdfunding campaign
-

Founder and CEO

2007 – 2021

InReach Solutions

Woodstock, GA / Portland, OR

- Built the entire platform from scratch and grew it organically to ~80 clients over 14 years; zero outside funding, fully bootstrapped
- Designed a code-generation framework that let non-technical staff configure complex workflows through a GUI; agencies consistently chose us over Salesforce
- Managed PII-sensitive data (adoption and foster care records) across varying state regulatory requirements for over a decade
- Ran every business function simultaneously: architecture, development, product management, marketing, founder-led sales, client delivery, and support
- Advised agencies on broader technology strategy, infrastructure decisions, and security practices; became their trusted technology partner

EARLIER CAREER

Independent Developer and Software Architect

2006 – 2007

Christian World Adoptions (CWA)

Atlanta, GA

- Designed and built a full case management system as a solo architect for international adoption; PII-regulated environment, zero margin for error
 - Delivered features that competing vendors said were not possible; turns out they just hadn't tried. The client chose my solution over the established players.
-

.NET Developer to IT Director

2003 – 2006

TPS (Transparent Systems)

Alpharetta, GA

- Self-taught the full .NET/SQL Server stack; started professional development at 18, promoted to IT Director at 21
- Managed overseas development teams, in-house servers, and database infrastructure for PII-sensitive adoption records

TECHNICAL DEPTH AND STRATEGIC LEADERSHIP

Technical

Strategic

- IT Strategy and Roadmap Development
-

- C#/.NET, Blazor (WASM and Server), SQL Server, Web APIs
- TypeScript, Astro, Tailwind CSS, Python
- Cloudflare, Azure, DevOps, CI/CD Pipelines
- AI Implementation and Governance Frameworks
- Technology Budgeting (lean optimization)
- P&L Ownership (14 years bootstrapped)

INDUSTRIES SERVED

Child Welfare & Social Services

Nonprofit Operations

Real Estate Technology

Enterprise SaaS

Wealth Management

Corporate Wellness

EDUCATION AND CREDENTIALS

- Professional Software Development, Self-Directed (2003 to Present); 23+ years of enterprise architecture, systems design, and technology leadership
- Kennesaw State University, Kennesaw, GA (2002-2003); Computer Science coursework

BEYOND THE WORK

I write about operational resilience, cybersecurity, and AI governance on LinkedIn and the Solanasis blog. I speak at startup and community events in Boulder.

Father of two. Passionate about education reform. You'll find me on a trail with my dog more often than not.
